WELCOME

A Letter from Our Founders

Dear Partner,

Thank you for taking the time to explore ICODO. We founded ICODO Technologies W.L.L. with a clear conviction: ambitious businesses deserve a technology partner who thinks like an owner — not a vendor who disappears after delivery.

Over the past eight years, our team has shipped more than fifty digital products across e-commerce, AI, enterprise systems, and SaaS. From luxury fragrance storefronts in the GCC to AI-powered visualization platforms and unified retail POS ecosystems, we have seen what separates products that launch from products that last.

That difference is architecture, clarity, and partnership. We advise before we build. We challenge assumptions when scope drifts. We write code your future team will maintain. And we stay after go-live to iterate, optimize, and expand.

This profile outlines who we are, how we work, and the outcomes we deliver. Whether you are scoping an MVP, modernizing enterprise operations, or exploring AI for your business, we would welcome a conversation.

We look forward to building something meaningful together.

Ahmad Hassan Khan & Khair-eddine Hamata

Co-Founders, ICODO Technologies W.L.L.

ABOUT US

About ICODO

We exist to turn ambitious ideas into dependable software.

ICODO is a premium digital product development studio headquartered in Qatar, serving startups and enterprises across 12+ countries. We specialize in custom software, SaaS platforms, AI solutions, mobile applications, and enterprise systems — delivered with the rigor of a consulting firm and the velocity of a product team.

Unlike agencies that hand projects to anonymous offshore teams, ICODO's co-founders stay hands-on from architecture through launch. Every engagement gets direct access to senior builders — no account-manager layers, no miscommunication, no surprises.

OUR JOURNEY

- 26

ICODO Founded
Launched ICODO Technologies W.L.L. as a premium digital product studio serving startups and enterprises.
- 24

Product Expansion
Delivered AI, SaaS, and enterprise platforms across retail, logistics, and education.
- 21

Enterprise Expansion
Delivered POS, inventory, and multi-channel commerce platforms.
- 18

Studio Origins
Started building digital products for regional retailers and startups.

PURPOSE

Our Vision & Mission

Our Mission

ICODO helps businesses build digital products that create real commercial value — not demos that never ship. Every engagement is grounded in measurable outcomes: revenue growth, operational efficiency, and competitive advantage.

Our Vision

To be the technology partner founders and executives trust when the stakes are high and the architecture must last. We aim to set the standard for premium digital product development in the MENA region and beyond.

OUR VALUES

Business First

Every technical decision ties back to a measurable business outcome.

Radical Clarity

Transparent scope, honest timelines, and direct communication.

Craft at Scale

Clean code and thoughtful design — even under deadline pressure.

Partnership

We succeed when your product succeeds long after launch day.

These values guide every discovery call, architecture decision, and line of code we write. They are not posters on a wall — they are how we choose which projects to take, how we communicate when timelines shift, and how we measure our own success.

WHY ICODO

Why Businesses Choose ICODO

A technology partner that thinks like your business — not order-takers, but advisors who challenge assumptions and build systems that still make sense two years from now.

Strategic Consulting

Product and technical decisions grounded in business outcomes, not hype. We help you choose the right path before writing a single line of code.

Scalable Architecture

Systems designed to grow with your users, data, and revenue. No rewrites at Series A — architecture that scales from day one.

Clean, Maintainable Code

Engineering standards your future team will thank you for. Documented, tested, and built for long-term ownership.

Fast Communication

Direct access to senior builders — no layers of account management. Slack, weekly demos, and honest updates.

Dedicated Team

Consistent people on your project from kickoff through launch. Same engineers, same context, same quality bar.

Long-Term Partnership

We stay after go-live to iterate, optimize, and expand. Launch is the beginning, not the end of our relationship.

WHAT WE DO

Our Services

Business solutions, not technology lists. We organize our work around outcomes your leadership team cares about.

Digital Product Development

End-to-end product strategy, UX, and engineering for web platforms that users adopt and businesses depend on.

AI Solutions & Automation

Intelligent workflows, AI-assisted products, and automation that reduce manual work and unlock new capabilities.

SaaS & Platform Engineering

Multi-tenant architectures, subscription billing, and scalable backends for software-as-a-service businesses.

Mobile Applications

Native and cross-platform apps for customers, field teams, and operations — built for performance and reliability.

Enterprise Systems

POS, ERP, CRM, and internal tools that connect departments and replace fragmented spreadsheets.

eCommerce & Shopify

High-converting storefronts, headless commerce, and integrations that unify online and offline sales.

INDUSTRIES

Industries We Serve

We adapt our process to your domain while bringing patterns that accelerate delivery.

- Retail & E-Commerce
- Food & Hospitality
- Real Estate
- Healthcare
- Logistics
- SaaS & Startups
- Enterprise
- Government

Retail & E-Commerce

Headless storefronts, POS integration, inventory sync, and omnichannel experiences for modern retailers.

AI & Innovation

AI-assisted products, automation pipelines, and intelligent workflows that create competitive differentiation.

Enterprise & Operations

POS, ERP, CRM, and internal tools that unify departments and replace manual processes.

Education & EdTech

Learning management systems, course platforms, and student engagement tools built for scale.

HOW WE WORK

Our Development Process

Structured delivery with transparency at every stage — so you always know where your investment is going.

01

Discovery

We align on goals, users, constraints, and success metrics.

02

Planning

Scope, roadmap, architecture, and a clear delivery plan.

03

Design

UX flows, UI systems, and prototypes validated with stakeholders.

04

Development

Iterative builds with demos, code reviews, and quality gates.

05

Testing

QA, performance, security checks, and user acceptance.

06

Deployment

Production launch, monitoring, and handoff documentation.

07

Support

Ongoing partnership, enhancements, and long-term evolution.

TECHNOLOGY

Technologies

Modern stack, chosen deliberately. We select tools for maintainability and team velocity — not resume padding.

FRONTEND

React Next.js TypeScript Tailwind CSS

BACKEND

Node.js Python REST GraphQL

MOBILE

React Native iOS Android

CLOUD

AWS Vercel Docker Serverless

AI

OpenAI Custom ML Pipelines Automation

DATA

PostgreSQL Redis MongoDB

COMMERCE

Shopify Headless Commerce Stripe

Technology choices are made per project based on team skills, scalability requirements, and time-to-market — never because a framework is trending. We document every architectural decision so your team can maintain and extend the platform independently.

ENGAGEMENT

Engagement Models

Clear engagement models — from a focused discovery sprint to full product builds and long-term scale partnerships.

Discovery Sprint

From \$5,000

2 weeks

Validate your idea, define scope, and leave with a roadmap you can execute — with or without us.

- Stakeholder workshops
- Technical feasibility review
- UX wireframes for core flows
- Architecture recommendation
- Fixed-scope proposal for build

MOST COMMON

MVP Build

\$15,000 – \$30,000

12–20 weeks

End-to-end design and engineering to launch a production-ready product.

- Product design system
- Full-stack development
- Weekly demos & Slack access
- QA and deployment
- 30-day post-launch support

Scale Partnership

From \$10,000 / mo

Ongoing

A dedicated senior team embedded with yours — shipping features and evolving the platform.

- Dedicated engineers & PM
- Roadmap planning
- Performance & security reviews
- Priority support
- Flexible monthly scope

Final quotes depend on scope and timeline. Minimum engagement typically starts at \$5,000.

PORTFOLIO

Featured Projects

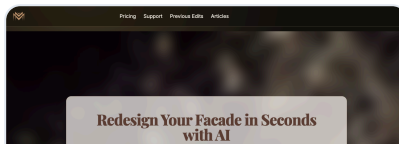

A selection of web, mobile, and enterprise platforms delivered for clients across the GCC and beyond.

E-COMMERCE

ASSAM

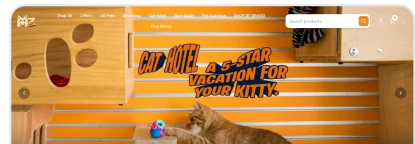

Luxury fragrance e-commerce experience.

AI PRODUCT

MAAN

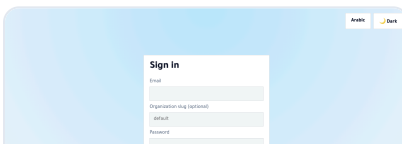

AI-assisted facade and exterior design previews.

RETAIL

MiniZoo

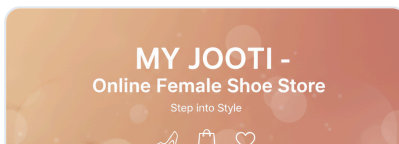

Pet supplies store — omnichannel retail.

ENTERPRISE

POS Suite

Unified point-of-sale and inventory system.

E-COMMERCE

MyJooti

Bilingual footwear storefront from Europe.

LOGISTICS

Tracko

Fleet management and logistics tracking.

EDTECH

Ilm Desk

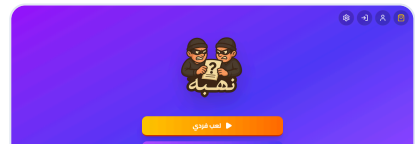

Learning management system for courses.

REAL ESTATE

Property View

Real estate listings and discovery platform.

WEB APP

Nehbah

Atmospheric trivia-style web game.

CASE STUDY

ASSAM — Luxury E-Commerce

Luxury fragrance e-commerce built for conversion and brand prestige.

Category: **E-Commerce** Timeline: **12 weeks** Year: **2025**

THE CHALLENGE

A premium fragrance brand needed a digital storefront that matched the elegance of the product — not a template that felt generic or slow at checkout.

OUR APPROACH

ICODO designed and engineered a custom e-commerce experience with refined product storytelling, fast catalog browsing, and a checkout flow optimized for mobile buyers in the GCC.

KEY FEATURES

- Custom product detail experiences
- Shopify headless integration
- Mobile-first checkout
- SEO-optimized catalog structure
- Performance-tuned asset delivery

TECHNOLOGY

React

Next.js

Shopify

Node.js

Vercel

BUSINESS IMPACT

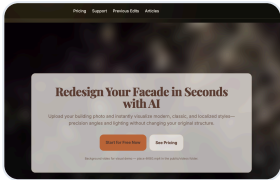

- Page load times dropped from 3.4s to 2.1s on mobile.
- Product detail engagement increased with rich imagery and faster transitions.
- Headless architecture lets merchandising launch collections without engineering bottlenecks.

CASE STUDY

MAAN — AI Product Platform

AI-assisted visualization for architecture and exterior design decisions.

Category: **AI Product** Timeline: **16 weeks** Year: **2025**

THE CHALLENGE

Clients struggled to visualize facade and exterior changes before committing to costly renovations — slowing sales cycles and increasing uncertainty.

OUR APPROACH

We built an AI-powered preview platform that lets users upload properties and explore design directions instantly, turning abstract ideas into tangible visuals.

KEY FEATURES

- AI image generation pipeline
- Project and preview management
- Responsive web application
- Secure user workflows
- Admin tooling for content control

TECHNOLOGY

React

TypeScript

Node.js

AI APIs

PostgreSQL

BUSINESS IMPACT

- Consultation-to-close cycles shortened as clients aligned on visuals before procurement.
- Sales teams use AI previews as a differentiator in a market still relying on static catalogs.
- Platform architecture supports additional AI features without a ground-up rebuild.

LEADERSHIP

Our Team

Two co-founders who stay hands-on from architecture through launch — no anonymous offshore handoffs, no account-manager layers.

Ahmad Hassan Khan

Founder & Technical Lead

A passionate software engineer specializing in digital product development, scalable web applications, mobile apps, AI-powered solutions, and enterprise software. Dedicated to helping businesses transform ideas into innovative products through clean architecture, modern technologies, and a strategic, business-first approach.

Khair-eddine Hamata

Co-Founder & Lead Software Engineer

A passionate full-stack software engineer with expertise in building scalable web applications, mobile apps, AI-powered solutions, and enterprise software. Committed to delivering clean, maintainable code and transforming complex business requirements into reliable digital products that drive long-term growth.

CLIENT VOICES

Testimonials

Trusted by founders and operators who needed more than a vendor
— they needed a technology partner.

"Working with ICODO was one of the best decisions we made for our product. Their team quickly understood our business requirements, proposed valuable improvements, and delivered a modern, scalable platform that exceeded our expectations."

Michael Carter

Founder & CEO, NovaTech Solutions

"From planning to deployment, the ICODO team demonstrated exceptional professionalism and technical expertise. They transformed our ideas into a high-performing digital product while always keeping our business goals in focus."

Daniel Thompson

Managing Director, Vertex Innovations

"ICODO didn't just build an application—they became a trusted technology partner. Their attention to detail, clean development practices, and proactive communication made the entire process seamless."

Sara Mitchell

Operations Director, Elevate Commerce

AFTER LAUNCH

Support & Maintenance

Launch is the beginning, not the end. We provide structured post-launch support so your product stays secure, performant, and evolving.

30-Day Post-Launch Support

Every MVP Build includes 30 days of priority support after deployment — bug fixes, minor adjustments, and monitoring setup at no additional cost.

Scale Partnership

For ongoing needs, our Scale Partnership embeds a dedicated team for continuous feature delivery, performance reviews, and security updates.

Performance Monitoring

We set up production monitoring, error tracking, and uptime alerts so issues are caught before your users notice.

Documentation & Handoff

Comprehensive technical documentation, deployment guides, and knowledge transfer sessions ensure your team can operate independently.

Security Updates

Regular dependency audits, patch management, and security reviews to keep your platform protected as threats evolve.

Feature Evolution

Roadmap planning, A/B testing support, and iterative enhancements based on user feedback and business metrics.

PROMISE

Our Commitment

What you can expect when you partner with ICODO — written commitments, not marketing fluff.

- ✓ **Response within 24 hours** — Every inquiry receives a thoughtful response within one business day.
- ✓ **Transparent scope and pricing** — No hidden fees, no scope creep without explicit approval and updated estimates.
- ✓ **Weekly progress demos** — You see working software every week, not slide decks or status reports.
- ✓ **Direct founder access** — Senior builders on every call. No junior developers learning on your budget.
- ✓ **Production-ready delivery** — QA, security checks, and deployment included. We do not hand off unfinished work.
- ✓ **Clean code ownership** — Full source code, documentation, and IP transfer. Your product, your codebase.
- ✓ **Honest recommendations** — If we are not the right fit, we will tell you — and point you in a better direction.
- ✓ **Long-term partnership** — We measure success by your product's performance years after launch, not just delivery date.

These commitments reflect how we run every engagement — from a two-week Discovery Sprint to a multi-year Scale Partnership. They are the standard our clients hold us to, and the standard we hold ourselves to.
